1. Introduction

Welcome to **Refa**, a ride-hailing mobile application designed for users in Pakistan. This Privacy Policy explains how we collect, use, store, and protect your personal information when you use the Refa app.

By using the Refa app, you agree to the collection and use of information in accordance with this policy. If you do not agree, please do not use the app.

2. Information We Collect

2.1 Information You Provide

When you register and use Refa, we collect:

Data Type	Purpose
Full Name	Displayed to driver/passenger during rides
Email Address	Account creation and login (Firebase Authentication)
Phone Number	Contact between passenger and driver
Home/Work Address	Quick pick-up selection (optional)
Profile Picture	Identification during rides (stored as Base64 in Firestore)
Vehicle Information	Required for driver registration (model, plate number, type)

2.2 Information Collected Automatically

Data Type	Purpose
GPS Location	Real-time ride tracking, fare calculation, driver dispatch
Device Token (FCM)	Push notifications for ride requests and status updates
Ride History	Stored in Firestore for user reference and dispute resolution
Wallet Transactions	Financial records for fare deductions and top-ups

3. How We Use Your Information

We use your information to:

- **Provide the core service** — match passengers with nearby drivers
 - **Process payments** — deduct fares and credit driver wallets through secure Firestore transactions
 - **Send notifications** — alert drivers of new ride requests; update passengers on ride status
 - **Ensure safety** — real-time location sharing between passenger and driver during active rides
 - **Prevent fraud** — Firestore transaction-based atomic ride acceptance prevents double-booking
 - **Improve the app** — ride history and usage patterns help us improve matching and pricing
-

4. Data Storage and Security

4.1 Where Your Data Is Stored

All data is stored on **Google Firebase** (Firestore, Realtime Database, Storage). Firebase complies with international data protection standards including:

- ISO 27001 (Information Security)
- SOC 2 Type II
- GDPR (General Data Protection Regulation)

4.2 Security Measures

- **Authentication:** Firebase Authentication with industry-standard email/password hashing
 - **Database Rules:** Firestore security rules restrict read/write access to authenticated users only
 - **Wallet Transactions:** Processed via Firestore atomic transactions — no single transaction can partially succeed
 - **Profile Pictures:** Stored as Base64 strings within your user document, not publicly accessible
 - **Location Data:** GPS coordinates are only stored during active rides and cleared upon completion
 - **HTTPS:** All Firebase communication uses TLS/HTTPS encryption
-

5. Location Data

Refa requires access to your device's location for core functionality:

- **Passenger location:** Used to show your position on the map and calculate ride fares
- **Driver location:** Continuously updated via a foreground service while driver mode is active, enabling real-time tracking for passengers
- **Accuracy:** We use GPS (fine location) for accurate positioning
- **When we stop:** Location collection stops when the ride is completed or cancelled

You can revoke location permission in Android Settings → Apps → Refa → Permissions → Location. Note: revoking location will prevent you from booking or accepting rides.

6. Sharing Your Information

We do **NOT** sell your personal information to third parties.

Your information is shared only in the following limited cases:

Scenario	What is Shared	With Whom
Active ride	Passenger name, phone	Assigned driver only
Active ride	Driver name, vehicle, location	Passenger only
Notifications	Ride details	Firestore Cloud Messaging (Google)
Maps	Location coordinates	Google Maps SDK (for map display)

7. Data Retention

Data	Retention Period
Account data	Until account deletion
Ride history	Indefinitely (for dispute resolution)
GPS location during ride	Deleted from active field after ride ends
FCM tokens	Updated on each login; old tokens expire automatically
Driver lock records	15 days from driver mode activation

8. Children's Privacy

Refa is not intended for users under **13 years of age**. We do not knowingly collect personal data from children. If you believe a child has provided us with personal data, please contact us immediately.

9. Your Rights

You have the right to:

- **Access** — Request a copy of data we hold about you
- **Correction** — Update your profile information directly in the app (Profile screen)
- **Deletion** — Request deletion of your account and associated data by contacting us
- **Restriction** — Stop location collection by revoking permissions in Android settings

10. Third-Party Services

Refa uses the following third-party services. Please review their privacy policies:

Service	Provider	Policy Link
Firebase (Auth, Firestore, Storage, FCM)	Google	https://firebase.google.com/support/privacy
Google Maps SDK	Google	https://policies.google.com/privacy
Google Directions API	Google	https://policies.google.com/privacy

11. Changes to This Policy

We may update this Privacy Policy from time to time. We will notify you of any significant changes by updating the "Last Updated" date at the top of this document. Continued use of the app after changes constitutes acceptance of the new policy.

12. Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy, please contact:

M.Rehan Sharif ■ Email: rehansharif000@gmail.com ■ WhatsApp: +92 319 6664812

This privacy policy was prepared in compliance with Google Play Store requirements and general data protection best practices.
